**BROODER GUARD**  
MIGRATION FENCING FOR REARING CHICKS

RELENTLESS QUALITY. EXCEPTIONAL SERVICE.

## BROODER GUARD MIGRATION FENCE

The brooder guard plastic migration fencing is a flexible and very durable solution for the formation of rearing groups within the house. They are joined together by connecting hinges to form rings.

### ADVANTAGES

- Secure connection of the brooder guard elements at the top and bottom with connecting hinges, which allow folding during dismantling.
- Flexible and lightweight plastic segments 31.5" x 15.75" (800 x 400 mm) allow assembly by one person.
- The integrated carrying handles enable the transport while assembled.
- Rearing ring complex enlargement is simple and quick.
- Slots for the drinking lines can be easily cut with a knife at the pre-stamped separation points. For stiffening and stabilization, stabilizers are pushed onto the top edge, providing re-stabilizing of the brooder guard in the area of the slot.
- The restricted view calms the animals, and the shape of the grid maintains air circulation in the ring.
- Thorough cleaning of the brooder guard is fast and easy.

### LAYOUT

Ring Ø	11.5'	14.75'
Elements	12	18
Animals / ring	approx. 280	approx. 380
